SHARK IN PORTO S.ELPIDIO

ATTENTION

Attention a shark was sighted on May 2, 2023 at 1.34 pm by the sarritzu family and their 5-year-old daughter Nicole sarritzu. thought to be an Elephant Shark , we still don't have new news on what happened we will inform ourselves better we will send submarines to look for the shark and prevent some people from dying . it is thought to be dangerous and therefore all the beaches have imposed a ban on bathing for prevention.

Everyone is warned not to enter the water and I recommend spreading the word for those who are not aware of it. Could be even going back to where it came from the important thing is to comply with the rules it could have come from the Atlantic Ocean, it is 2 and a half meters in size and 23 centimeters wide, it is very large

Agenda setting theory
 The theory suggests that the media has the ability to shape public opinion by determining what issues are given the most attention. A news story passes through different professionals before it is finally published. For example, a media company that has business interests in other sectors can benefit from positive coverage of certain products (by e.g. set interviews with experts)
